

## **Botox® Cosmetics**

Hallmark Health Cosmetic & Laser Center is pleased to offer you Botox® Cosmetics, a prescription medicine that is injected into muscles and used to improve the look of moderate to severe frown lines between the eyebrows (glabellar lines) in people 18 to 65 years of age for a short period of time (temporary). At Hallmark Health Cosmetic and Laser Center, BOTOX® Cosmetic is administered by a healthcare professional as a simple, nonsurgical treatment.

## **Frequently Asked Questions**

### **How does BOTOX® cosmetics work?**

- BOTOX® Cosmetic is a prescription medicine that is injected into muscles and used to improve the look of the "11s," the moderate-to-severe frown lines between the eyebrows (glabellar lines). It works by blocking nerve impulses to the injected muscles. This reduces muscle activity that causes moderate to severe lines to form between the brows.

### **When will I see results from a Botox® cosmetic treatment?**

- Within days, you may see a marked improvement in the moderate-to-severe frown lines between your brows. Lines continue to improve for up to 30 days, and results can last for up to 4 months. Individual results may vary.

### **Is treatment with BOTOX® cosmetics painful?**

- Discomfort is usually minimal and brief. Prior to injection, the area may be numbed with a cold pack. The entire procedure takes approximately 10 minutes. Most patients are in and out without downtime following BOTOX® Cosmetic treatment. Side effects associated with the injection include localized pain, infection, inflammation, tenderness, swelling, redness, and/or bleeding/bruising.

### **What will happen to the wrinkles if I choose not to continue treatments?**

- If you do not continue treatments, the wrinkle lines will gradually return to the way they looked before treatment.
